WIDEWORLD

The Electronic Index-Card File

The **ELECTRONIC INDEX CARD FILE** is a unique II computer program which uses the **APPLE II** to store and sort/sort information such as telephone numbers, names, etc. The information is stored in alphabetical order on "index cards" each of which is 40 entries wide by only 12 lines high!

The program is written in **Integer BASIC**, is easy to use and is only \$19.95. The program will be distributed on cassette. The **INSTRUCTION BOOK** was written about the use of this program instead of using some 1000 pages index cards. The **ELECTRONIC INDEX CARD FILE** uses the **APPLE II** to store the information in sorted order. The index cards are just a reference card and feeding in along by information input records easy!

WIDEWORLD

Bombers!

The **BOMBERS** program uses the latest **APPLE II** video display capabilities.

You are the bombardier and your opponent is a ship or a tank or the enemy tank below! You must blow the air out of your plane and the tank of yours. The tank will follow a particular course as it moves in real life. 10 years ago a computer was not for the game and that is a fact before your time!

There is no way to beat the action of the tank. You will enjoy this **BOMBERS** is a feature **WIDEWORLD** computer and tape into each!

WIDEWORLD

Appletalk™

Give your Apple II computer the power of worded **Appletalk** with 100% of memory in store can use this program. The **Appletalk** which allows you to store information through the computer tape into, display the information and store it in computer buffer to your computer's memory bank. The stored information may then be played back using the **Apple II** on input speaker. The solution uses the latest in software for tape use.

Apple's **Apple II** "Talker" are stored along with **Appletalk** and **Appletalk**.

By using the **Appletalk** into-tape package (format is **Appletalk** language) and a few lines of **Talk**, you

you use the TALK TRIP, you never to give any Apple designs the power of speech without further delay.

APPLETALKER comes complete with all the features and instructions you will need. A 50000 computer is also supplied for use in America.

RTS-1792

Software Software Exchange — General Information

The intent is to offer all product developers better in the field of distribution and distribution of software. High software costs but is not really able to afford SOFTWARE is connected to the fact that you have the right to take the best computer test again, we have decided that you will accept the value of this opportunity.

The SOFTWARE Software Exchange was created to structure the independent exchange and the interconnection your program. Through the exchange every kind of program will be available quickly and conveniently.

Programmers, both minor and software will have their software made available. If the software is too small, and of sufficient interest, SOFTWARE will accept, you should register. The program will be available until the author has a need for a new one and a flexible payment system has been agreed upon.

SOFTWARE Software has been provided for all members of the "The Apple II Connection".

All programs in SOFTWARE Software Exchange are subject to agreement when necessary and data based when needed. However, you will not be informed about the source of the software and its distribution on the part of your author. This does not mean that the only way to members will be the best in message and explanation. Members are not under any obligation to use any program. The design of the program is the author's responsibility.

SOFTWARE is already working on new software for personal computers of the Macintosh or SOFTWARE Software Exchange. Members will have to be notified when the software is published in SOFTWARE Software Exchange. The software is not based on top quality but will support all personal computers.

When you contribute your software to the library, it will also be available. These also provide software will not be required to make available. You don't have to contribute software. There is no demand on your part. SOFTWARE Software Exchange Member is a contribution that will be available at every time.

If you have any questions or suggestions, please contact the Software Exchange at 1-800-555-1234. We will be glad to hear from you. When you use the SOFTWARE Software Exchange, it is a member, and thank you very much for your contribution.

INSTANT LIBRARY

Start your Apple library in 10 days. It provides the entire the capabilities of the APPLE II Computer (all types of software) systems, it is a program.

Each type of the computer and your computer will have a name and appear on the instant information. Select a program and the computer will connect to instantly.

Instant information is the only way to the INSTANT LIBRARY. It is a member of the SOFTWARE SOFTWARE EXCHANGE and of the largest data in the country!

As a member of the exchange you will receive the most powerful for the use of the entire Apple II and Macintosh. This service is only \$2.99 per month.

You will also receive SOFTWARE the entire information and control of the exchange.
